

COASTAL MACHINE AND SUPPLY, INC.

Precision Contract Manufacturing | Defense · Space · Oil & Gas

FOR IMMEDIATE RELEASE

Medora Manufacturing Makes Long-Term Majority Investment in Coastal Machine and Supply, Inc.

Carencro, LA — July 15, 2026 — Medora Manufacturing today announced a long-term majority investment in Coastal Machine and Supply, Inc., an AS9100, ISO 9001, API Q1 certified, ITAR-registered precision contract manufacturer serving Defense, Space, and Oil & Gas customers. Kody Guidry continues to lead the company as Chief Executive Officer and remains an equity partner in the business.

Medora has committed more than \$10 million in growth capital to Coastal's operations in the Lafayette area. A multi-year program will expand the company's facilities, equipment, and workforce — including bringing metal finishing in-house and building toward production-rate manufacturing of large, hard-metal components, while continuing the short-lead-time, complex, low-volume work its customers count on today.

The reasoning is simple: demand for these components is growing faster than the capacity to produce them, and Coastal's customers need more of what Coastal already does well. Medora looked across the country for manufacturers with the team and the track record to grow into that demand.

Coastal continues to operate under its existing name and quality system. Certifications, ITAR registration, and the CMMC compliance program remain in place, and customer programs continue without interruption. Keith Guidry, Kevin Credeur, Kevin Robin and Damon Guidry, who built the business alongside Kody, set the partnership up for success and a smooth transition into the next chapter. Both Keith Guidry and Kevin Credeur have families remaining involved in employment.

"We've built a team and a reputation for handling the work most shops won't touch, and this partnership puts real resources behind everything we've accomplished together. It means we can move faster on our expansion, add capacity for the programs our customers are counting on, and give our people room to grow. The mission doesn't change — we've just got more horsepower to deliver on it," said Kody Guidry, Chief Executive Officer of Coastal Machine and Supply.

"We spent a long time looking for a business we believed in — a team that earned its customers' trust doing genuinely difficult work — and this is it. Our intent is simple: back this team, invest in the equipment and capacity their customers are asking for, invest in the people, in training and supporting them, and build a strong business for the long term. Coastal's people are the reason we're here, and if a serious career in manufacturing interests you, come take a look," said Michael Ostroff and Max Bergstein, co-founders of Medora, in a joint-statement.

ABOUT COASTAL MACHINE AND SUPPLY, INC.

Coastal Machine and Supply, Inc. is a precision contract manufacturer based in Carencro, Louisiana, specializing in large, complex turning and 5-axis milling for Defense, Space, and Oil & Gas programs, delivering mission-critical components to demanding tolerances and standards.

ABOUT MEDORA MANUFACTURING

Medora Manufacturing acquires and scales American manufacturers of large, critical, hard-metal components for Next Generation Aerospace, Space and Defense programs; and invests in the people, equipment, and facilities they need to grow.
